PROFESSIONAL SUMMARY

Senior Data Engineer with more than 15 years of experience in information technology, working across data engineering, lakehouse architecture, enterprise integrations, data warehousing, and business intelligence. Technical lead of a data architecture and engineering team, working across the full project lifecycle in Cloud and On-Premise environments, with a focus on operational efficiency, scalability, and business value.

TECHNICAL SKILLS

- **Data Engineering:** Databricks, Apache Spark, Delta Lake, Lakehouse, Data Mesh, Azure Data Factory, Apache Airflow, Azure Data Lake Storage, ETL/ELT, Data Warehouse, Data Modeling, Data Governance, Unity Catalog, MLflow, Azure Functions, CI/CD.
- **Integrations:** Oracle Integration Cloud, SSIS, Digibee, iWay, APIs, Cloud/On-premise Integrations.
- **Programming and Data:** Python, SQL, PySpark, PL/SQL, Shell Script, Pandas, FastAPI, Informatica PowerCenter.
- **Databases:** MySQL, SQL Server, Oracle, PostgreSQL, DB2, MongoDB, SQLite.
- **BI and Analytics:** Power BI, Dash, Streamlit, Executive Dashboards, Data Analysis.
- **Methodologies:** Scrum, Kanban, Agile practices, FinOps, MLOps, DataOps, DevOps.
- **Other:** Git, GitHub, Docker, REST API, Web Scraping, Terraform, JFrog, SonarQube, Great Expectations, OpenMetadata, Azure DevOps.

PROFESSIONAL EXPERIENCE

Energisa

August 2021 – Present

Senior Data Engineer

Rio de Janeiro, Brazil

- Technical lead of the data architecture and engineering team within the innovation division.
- Development and maintenance of complex data pipelines, integrating cloud and on-premise environments.
- Workflow orchestration with Microsoft Azure Data Factory and Apache Airflow.
- Large-scale data ingestion, processing, and enrichment with Databricks and Apache Spark.
- Implementation of a Lakehouse architecture, including the creation and management of Delta tables.
- Management of Microsoft Azure Data Lake Storage repositories to support advanced analytics and processing at scale.
- Development and optimization of Python scripts for automation and ETL process efficiency.
- Creation and maintenance of Microsoft Power BI dashboards to support decision-making.
- Automation of tasks and processes with Microsoft Azure Functions.
- Implementation of automated CI/CD pipelines, ensuring speed and safety in deliveries.
- Automated and scalable infrastructure provisioning using Terraform.
- Definition of technical standards within the cloud environment, ensuring best practices throughout the project lifecycle.

Elera Renováveis

November 2015 – August 2021

Systems and Data Integration Specialist

Rio de Janeiro, Brazil

- Owner of the company's integration ecosystem, with more than 130 integrations running in production.
- End-to-end responsibility (development, deployment, configuration, testing, support, and operational management) across iWay, SSIS, Digibee, and Oracle Integration Cloud.
- Development of the corporate data lake with integration to Azure Data Catalog.
- Contributed to the creation of a commercial data mart and an integrations dashboard.
- Authored functional and technical specifications, solution designs, quick guides, and architecture documents.
- Led critical integrations in the ERP upgrade project.
- Collaborated with an international technical team (Canada) on global integrations.
- Participated in disaster recovery testing, strengthening resilience and business continuity.

MJV Innovation

October 2012 – November 2015

Data Consultant

Rio de Janeiro, Brazil

- Technical owner of the corporate EDW in an insurance company project.
- Planning and execution of data loads and processes following the client's methodology.

- Development of solutions with Informatica PowerCenter, Oracle, SQL Server, Project, and Erwin.
- Acted as the interface between the delivery team and the client for requirements gathering and solution specification.

Previous Experience

- **Accenture** — Senior Process Analyst (Business Intelligence), July 2012 – October 2012: continued Oi's BI activities under a BPO model.
- **Oi** — Control and Information Analyst, May 2011 – July 2012: BI/DW projects, definition of reports and dashboards, functional and technical specifications, and demand management with business areas.
- **IBM** — IT Specialist and Intern, August 2006 – May 2011: BI/DW projects for telecommunications clients using Oracle, Informatica PowerCenter, DataStage, Teradata, Erwin, and UNIX; SQL/PL/SQL optimization, data load and environment management.
- **Sonda** — Support Analyst, July 2004 – August 2006: level 3 support across Windows and Linux environments nationwide.

EDUCATION

FIAP	2022 – 2023
<i>MBA in Data Engineering</i>	<i>São Paulo, Brazil</i>
UFRJ	2012 – 2013
<i>MBA in Business Intelligence</i>	<i>Rio de Janeiro, Brazil</i>
UniCarioca	2004 – 2008
<i>Bachelor's Degree in Systems Analysis</i>	<i>Rio de Janeiro, Brazil</i>
